Design Study of scFlowVis: Supporting Single-Cell RNA Sequencing Analysis through Visual Analytics
Supplementary Material IV: Interface Implementations Corresponding to Design Schematics

Yiwen Xing, Stanley Owomero, Sophia Tsoka, Rita Borgo, and Alfie Abdul-Rahman

This figure presents the actual interface implementations corresponding to the schematic designs shown in Figure 1 (I–VI) of the main text. Each implementation reflects the state of the system at the time of the respective design iteration, providing concrete examples of how the schematic sketches were realized in practice.
